In-house Apt-Repo: <https://apt.iteas.at>

GITLAB:

Manchmal ist es notwendig das man die Windows Recovery Partition nicht haben möchte, z.B. bei virtuellen Maschinen. Löschen kann man diese Partition nur über Windows shell:

```
diskpart

list disk
select disk X (replace X with the number of your disk)
list partition
select partition Y (replace Y with the number of the recovery partition)
delete partition override
```
